Boston, MA | New York, NY | Availability: May – December 2026 | <https://rebeccalee.netlify.app/>

EDUCATION:

Northeastern University, MA

Sep 2023 – Present

Khoury College of Computer Sciences

Candidate for Bachelor of Arts in Computer Science, Concentrating in Artificial Intelligence

Relevant Coursework: Fundamentals of Software Engineering | Object Oriented Design | Machine Learning & Data Mining

Activities: Women in Technology | Electric Racing | Oasis | CTF Club | Digital Illustration Association

SKILLS:

Languages: HTML/CSS, JavaScript, TypeScript, Python, Java, C/C++, C#, LaTeX, Bash, SQL, Assembly

Frameworks & Libraries: React, Node.js, NumPy, Pandas, TensorFlow, PyTorch, Scikit-learn, Keras, Matplotlib

Technologies: Git, MongoDB, Kubernetes, Datadog, Postman, Google Cloud Platform, Docker, Jupyter Notebook, VS Code

PROFESSIONAL EXPERIENCE:

Wayfair

Boston, MA

Software Engineer Co-op

Jul 2025 – Dec 2025

- Engineered production pipelines to export 4k+ daily scam feedback records via REST APIs, while integrating Datadog metrics and BigQuery logging to provide end-to-end visibility
- Slashed Keycloak (IAM) authentication load by 98% by utilizing caching, cutting daily requests from 180k to 3k and eliminating redundant auth overhead
- Accelerated model performance by ~31% by migrating services to Gemini 2.5-flash-lite and implementing JSON response schemas, achieving output reliability; used Unleash feature toggles for systematic A/B testing
- Streamlined MLOps workflows by architecting custom Docker environments and implementing observability handlers; successfully deprecated legacy services to reduce technical debt and infrastructure costs

International Ivy

Franklin, NJ

STEM Instructor

Jul 2024 – Aug 2024

- Instructed children ages 5-14 in 3D printing, robotics, and programming using Scratch and Python
- Ideated daily supplemental lesson plans and activities to reinforce learning

PROJECTS:

GameNite

Jan 2026 - Apr 2026

- Developed Minesweeper, Uno, and real-time private/group chats using React, TypeScript, and CSS, with automated tests in Vitest, Jest, and Playwright
- Led a full redesign of the website with light/dark mode, cohesive color/font themes, and enhanced user profiles
- Created a coin system for game wins and an in-app store allowing users to customize chats and profile elements

Stock Simulator

Jun 2024

- Engineered a stock trading simulator in Java with CLI and GUI interfaces, with Alpha Vantage API integration following an MVC architecture
- Implemented real-time stock data retrieval allowing users to make transactions, as well as manage, save, and load a stock portfolio

Ocean Awareness

Feb 2024

- Participated in HackBeanpot and created a functional informational website about the oceans in under 48 hours with React, Typescript, SCSS, and Next.js
- Built and deployed a dynamic frontend experience featuring smooth fade-in effects and scroll snapping

EXTRACURRICULAR EXPERIENCE:

Women in Technology

Boston, MA

Design Chair

Apr 2024 – Present

- Lead workshops on basic web development and mentor students through a 5-week neural network project
- Organize weekly meetings, including tech talks with industry partners and social events for women in technology
